Project No. 1981—Trans-Canada Highway, Reconstruction, North Approach to Ferrabee Tunnel, Mile 200.26 to Mile 200.51, Station 0+00 to Station 13+38.6.

SEALED TENDERS, marked "Tender for Project No. 1981—North Approach to Ferrabee Tunnel," will be received by the Minister of Highways in his office at the Parliament Buildings, Victoria, British Columbia, up to 2 p.m. (Pacific Standard time) on Wednesday, the 9th day of April, 1969, and opened in public at that time and date. Contractors are eligible if, at the time when the contract is

entered into, the contractor was a resident of Canada or, if the contractor is a corporation, it was, for a period of at least one year immediately prior to that time, incorporated and carrying on business in Canada or the owners of a majority of the shares of such corporation were resident, for a period of at least one year immediately prior to incorporation, in Canada.

Plans, specifications, and conditions of tender may be obtained from the Provincial Government Plan Viewing Room, 1414, 207 West Hastings Street, Vancouver 3, British Columbia (telephone 684-8918), or from the undersigned for the sum of ten dollars (\$10), which is not refundable.

Construction of this contract shall conform to the requirements of the applicable sections of the Department of Highways "General Specifications for Highway Construction." If the bidder does not already have a copy of these specifications, one may be obtained from the Provincial Government Plan Viewing Room, Vancouver 3, British Columbia, or from the undersigned for the sum of ten dollars (\$10), which is not refundable. All copies purchased are registered and amendments are forwarded when issued.

Each tender must be accompanied by a bid bond in an amount equal to five per cent (5%) of the tender price. This bond shall be forfeited if the tenderer declines to enter into a contract if called upon to do so. A performance bond and a labour and material payment bond, each in the amount of fifty per cent (50%) of the tendered sum, in a form acceptable to the Minister of Finance, must then be provided by the successful bidder prior to the award of the contract.

Tenders must be made out on the forms supplied and enclosed in the envelope furnished.

Tenderers are advised that all bidders will be required to satisfy the Minister of Highways, in writing, that they have the necessary qualifications to successfully perform the work. It is preferred that tenderers submit with their tenders a list stating the type, capacity, and present location (so that inspection can be made if necessary) of the equipment in their possession or at their disposal which is immediately available for the carrying-out of the work within the time limit specified without in any way curtailing or delaying any Departmental project that may be under contract at this date.

The contractor and all his sub-contractors shall employ only residents of Canada and shall refrain from discriminating against any person by reason of his race, religion, or political affiliations.

No tender will be accepted or considered which contains an escalator clause or any other qualifying conditions, and the lowest or any tender will not necessarily be accepted.

It is preferred that tenderers submit with their tenders a schedule of proposed construction operations showing estimated monthly progress for each phase of the construction work.

OFFICIAL COMMUNITY PLAN DISTRICT OF HOUSTON

1. *Application*.—This document together with the map bearing the certificate "This is the map referred to in section 1 of the District of Houston Official Community Plan" and signed and dated by the Minister of Municipal Affairs, which is deposited with the Inspector of Municipalities, Victoria, British Columbia, constitute the Official Community Plan for the District of Houston pursuant to the provisions of

Division (1) of Part XXI of the *Municipal Act*. A copy of the Official Community Plan shall be available for perusal at the offices of the municipality.

2. *Content*.—The Official Community Plan sets forth the general objectives and broad policies with regard to the use of land and the physical development of the municipality and its environs. It covers all land and water-covered areas within the municipality and sets out a schematic arrangement of principal classes of both public and private land uses and transport facilities.

3. *Purpose*.—The Official Community Plan is intended to provide a written policy supported by diagrams and maps stating a land-use policy for all the land and water surface within the District of Houston, for the information and guidance of private and public agencies and individuals, and to ensure that administrative decisions concerned with these policies or any refinements or necessary alterations to these policies are made within an appropriate framework and with due regard to over-all objectives and not as *ad hoc* decisions.

4. *Basic Concepts*.—The Official Community Plan is based generally upon

- (a) the objective of establishing all industrial forest processing plants utilizing the Pulp Harvesting Area Number Four and the supporting residential and service facilities within one integrated community in the District of Houston;
- (b) the principle that a land-use plan must relate to the whole urban area and reflect the best development of land for the citizens of the whole of the urban area;
- (c) the objective of integrating, as far as possible, existing village settlement with new urban development so that the new development complements the existing settlement and makes possible the attainment of high-quality environment for existing residents and future residents;
- (d) prevention of the formation of any haphazard and unnecessary fragmentation of the community;
- (e) the principle that planning and development policy must reflect the needs of the citizens as its prime purpose and the systems developed to facilitate the utilization of land must provide for
 - (i) living, recreation, and leisure activities;
 - (ii) education and cultural development;
 - (iii) work, industry, and commerce as a base for a developing culture;
 - (iv) a healthful environment and facilities for health services in the broadest sense;
 - (v) amenity in the surroundings and amenable total environment;
 - (vi) the conservation of daylight, fresh air, views, topography, and close relationship to natural surroundings;
- (f) integration with surrounding area as regards roads, municipal services, and land use;
- (g) the suitability of the various parts of the area for different land uses; and
- (h) the achievement of relationships and communications between different classes of land use which will provide an efficient, convenient, and pleasant community for the optimum economic and social benefit of its inhabitants, the inhabitants of the adjoining region, and ensuring the role of the community as a focus of social, economic, health, education, and welfare facilities.

5. *Methods*.—The plan seeks to achieve these objectives by setting out a schematic arrangement of land uses which

- (a) develops an attractive townscape, compacted and oriented to a strong central core;
- (b) relates to a series of municipal services with development of land phased in relation to the most economic pattern and sequence of municipal service extension;
- (c) ensures that at all stages during the development the then existing neighbourhoods are so phased to ensure viable levels of development within each neighbourhood;
- (d) maintains most of the area as a non-urban area;
- (e) creates an industrial area for the accommodation of forest-industry processing plants and any other basic or secondary industries well separated from residential and servicing facilities and institutions within the townscape;

(f) recognizes the need for a degree of flexibility so that the social and economic needs of the community can be met as they evolve and specific needs for housing and facilities are manifest;

(g) is related to an economic base, size, and growth rate assuming the following:—

(i) Existing village population of 700 being part of a district of 1,000;

(ii) The anticipated growth of the urban area will result in a population of 10,000–12,000 by 1981, with an over-all district population of 15,000;

(h) is phased in two major stages for residential development:—

(i) South side of Bulkley River to be developed first;

(ii) North side of Bulkley River to be developed when the first stage is completed.

6. *The Plan*.—To achieve the environment required of the Community Plan,

(a) the whole of the district is divided into five basic types of activity areas:—

(i) Residential Activity Areas: These are the basic places for living, education, and recreation on a day-to-day basis and are primarily family centred. They include day-to-day neighbourhood commercial uses and mobile-home parks suitably screened from other elements of the neighbourhood;

(ii) Commercial Activity Areas: These include the non-neighbourhood but district and regionally centred commercial and service industries, including transient and tourist accommodation, some service industrial activity, and the opportunity for residential activity, particularly on the fringes and tending to be non-family centred, in addition to major retail, office, government administration, recreation buildings, secondary education, and health facilities;

(iii) Industrial Activity Areas: These include all manufacturing, storage, and warehousing. Generally, industrial zones will not include any residential activity, with the exception of non-family accommodation for night watchmen. Minor commercial opportunities may be present in light industrial areas;

(iv) Public Use and Parks: These include recreation, education, and health facilities in addition to governmental functions;

(v) Non-urban: These include forestry, agriculture, and recreational activities, and ancillary residential uses in connection therewith;

(vi) Highways: The location of highways on the map is approximate;

(b) provision is made for:—

(i) Community and Service Facilities: A system of fire, police, and utility buildings, related to the distribution of population, buildings, and utilities, should be integrated with other aspects of the plan;

(ii) Transportation and Communications: The land-use plan discourages ribbon developments since these conflict with the function of major thoroughfares as traffic ways. The new subdivisions should attempt to select those areas where commercial advantage should be taken of thoroughfares but never flanking major thoroughfares, and generally are developed to minimize dependent frontages along major thoroughfares.

7. *Division of Municipality into Activity Areas*.—The whole of the district is divided into activity areas by major topographic features and major thoroughfares.

8. *Activity Area Uses*.—(a) Residential: Each residential neighbourhood within the residential activity area should

(i) be of sufficient size to support a balanced elementary-school programme;

(ii) be free as possible of traffic having both origin and destination outside of the neighbourhood, and be self-contained with respect to day-to-day ingredients and the activities of the elementary-school-aged child;

(iii) include the higher-density and non-family developments, which should tend toward the perimeters of the neighbourhoods to provide a buffer between extraneous noises and traffic and the larger family-centred developments. High-density de-

- velopments should be in close proximity to part of the parks system of the community;
- (iv) contain an elementary-school site of 5 to 8 acres;
 - (v) provide a neighbourhood park oriented toward the needs of the 6- to 12-year-olds, of approximately 4 acres and preferably in close proximity to the elementary school;
 - (vi) provide small play lots of up to 1 acre within one-eighth mile of any residential unit in the neighbourhood;
 - (vii) provide, at its perimeter and shared with adjoining neighbourhoods, opportunities for daily commerce, such as small grocery-stores and other convenience stores, and service-stations;
 - (viii) provide, at its perimeter and shared with other neighbourhoods, church and other community service activities which are neighbourhood centred but may require several neighbourhoods for support;
 - (ix) share a junior secondary school with each two to three neighbourhoods;
 - (x) ensure pedestrian circulation is a prime concern within the neighbourhood, particularly in the provision of convenient and safe paths from school and playground and local store to every residential unit in the centre. The pedestrian system must relate to school and recreation facilities which depend upon more than one neighbourhood; i.e., community parks, junior secondary schools;
- (b) Commercial Activity Areas:—
- (i) Town Centre: This is the major core and centre for retail, commercial, administration, and government functions and contains the major convention, tourist, culture, and recreation facilities. This activity area should be continually planned and developed as an integrated whole, particularly with regard to the use of land and the integration of vehicular and pedestrian routes and the provision of off-street parking. Secondary education and health facilities should be included and integrated with commercial and civic elements. Some service industries may be included;
- (c) Industrial Activity Areas:—
- (i) Light-industry activity areas envisage industry taking place on small land areas generating only mild traffic and not generally being offensive due to noise, concentration of traffic, smoke, dust, and tend to be low-scale buildings finished in attractive and permanent materials representing an appearance of structure and grounds not inconsistent with relative proximity to residential areas;
 - (ii) Heavy-industry activity areas envisage industry requiring large land areas, and generating heavy industrial or worker traffic and tending to be obnoxious to residential areas due to the high incidence of noise, smell, dust, smoke, and the like. They will normally include storage and manufacturing activities which may take place in short-life-expectancy type structures and include exterior storage;
- (d) Public Use and Parks: This area is restricted to health, education, recreational, cultural, government administration uses, and on that land which is in private ownership the zoning by-law will allow for alternate uses of land which are compatible with the uses allowed in contiguous activity areas;
- (e) Non-urban: The area designated as non-urban will remain for the most part as forest land and agriculture, except for ancillary residential uses on large parcels and where development is deemed essential and duly authorized for such other uses as mineral working, water supply, waste disposal, land and forest protection, communications and transportation facilities; municipal or Provincial facilities such as cemeteries, garbage dumps, park-land and recreation areas.
9. Existing Development.—Some existing facilities may not comply with the requirements for planned activity areas, and should be permitted to continue until specific programmes are developed for redevelopment to comply with planned activity area requirements.
10. Major Routes.—Approximate locations of possible future principal roads intended to serve and integrate the various land-use areas into a

workable community and forest-industry complex are shown in order to ensure that their feasibility will be fully examined before any incompatible development is authorized.

11. Implementation.—Zoning and subdivision regulations of the District of Houston shall be in conformity with the Official Community Plan and shall be utilized to achieve the land-use objectives of the plan by orderly, economic, staged extensions of the development area, services systems, and community facilities.

12. The zoning by-law of the municipality shall include provision for the issuance of development permits pursuant to section 702A of the *Municipal Act*.

13. A five-year capital works programme shall be adopted by the District of Houston and shall not be at variance with objectives of the Official Community Plan.

14. Within the District of Houston, development and sales programmes of lands conveyed by the Crown Provincial shall be initiated and scheduled to facilitate the community's growth and to achieve the land-use objectives of the plan in a manner consistent with the district's capital works programme.

15. The Official Community Plan is a long-range general plan which may require revision as a result of unpredictable changes of circumstances, and where essential such revision is possible under Division (1) of Part XXI of the *Municipal Act*. The capital works programme shall be reviewed annually and projected an additional year.
